

This note, that [was found here](#), as a part of [a collection](#) is written (completely with human hands) by [Rupadarshi Ray](#), was created on September 28, 2025 11:03:59 PM, was last modified on August 29, 2026 12:46:16 AM, and was exported on September 7, 2026 3:04:03 PM.

Whitehead manifolds

[1]

[2]

Consider the standard embedded solid torus

$$W_1 := \operatorname{im} (S^1 \times D^2 \hookrightarrow S^3)$$

Consider another solid torus

$$W_2 \subseteq W_1$$

be another embedded solid torus which is unkotted in S^3 such that

$$W_2 \cup N(m(W_1))$$

is a Whitehead link.

Continue with

$$W_{n+1} \subseteq W_n$$

Then the Whitehead manifold is

$$S^2 \setminus \bigcap_{n \geq 1} W_n$$

Current note has 0 direct children and 0 total descendants.
