## Bounded connected open subsets of $\mathbb{C}^n$

**(H Cartan)** Let  $\Omega \subseteq \mathbb{C}^n$  be a connected bounded open subset and

$$F : \Omega \rightarrow \Omega$$

be holomorphic. If for some  $p \in \Omega$  we have  $F(p) = p, \mathcal{D}_p F = \text{Id}$ , then  $F \equiv \text{Id}_\Omega$ .

☀ Without loss of generality, let  $p = 0$ . Then there exists  $0 < r_1, r_2 < \infty$  such that

$$r_1 D^n \subseteq \Omega \subseteq r_2 D^n$$
